

ETNA LATE SPRING INTERACTIVE COURSE 2018

**Downsizing surgical treatment
with systemic therapies**

**05/06 MAY 2018
GIARRE (Italy)**

G.R.E.T.A.
GROUP FOR RECONSTRUCTIVE
AND THERAPEUTIC ADVANCEMENTS

Chairmen

Maurizio B. Nava

Honorary Chairman and Founder of G.Re.T.A.

Tibor Kovacs

President-Elect European Society of Surgical Oncology

Faculty

John Benson

Addembrokes Hospital - Cambridge UK

Carmen Criscitiello

European Institute of Oncology - Milan IT

Isabel T. Rubio

Clinica Universidad de Navarra - Madrid SP

Giuseppe Catanuto

G.Re.T.A. - IT

Nicola Rocco

G.Re.T.A. - IT

Discussants

Rosa Di Micco

Dorin Dumitru

Antonio J. Esgueva Colmenarejo

Esteban Espinosa Corona

Emanuela Esposito

Cecilia Ferrari

Ayesha Khan

Edoardo Mattone

Giacomo Montagna

Nahid Nafissi

Yasmina Papas

Anastasia Peppè

Svanheidur Rafnsdottir

Caroline Richardson

Wafa Taher

Alessio Vinci

Educational methods

- Lectiones magistrales
- Interactive talks
- Pre-operative planning with living models
- Simulation of multidisciplinary meeting with case discussion
- Video sessions
- Peer to peer interaction

Main Topics

- Multidisciplinary integration of treatments for surgical de-escalation
- Post mastectomy breast reconstruction and radiotherapy
- Downsizing of axillary surgery
- Surgical planning and complex cases
- Secondary procedures after failed cosmetic outcome in high risk patients

05-05-2018

Afternoon session

13.00 Registration

13.45 Presidential address

14.00 *Lectio magistralis*: Complex reconstructions in the neo-adjuvant setting: Maurizio Nava

14.30 *Interactive talk*: downsizing axillary surgery. *Lecturer*: John Benson
Comments: Dorin Dumitru, Alessio Vinci

15.30 Coffee and refreshments

16.00 *Interactive talk*: primary systemic treatment: the very first therapeutic tool? Results from trials. *Lecturer*: Carmen Criscitiello *Comments*: Rosa di Micco, Anastasia Peppè

17.00 *Interactive talk*: integration of treatments and breast reconstruction Autologous or Implants +/- fat grafting. *Lecturer*: Maurizio Nava *Comments*: Esteban Espinosa Corona, Wafa Taher

17.30 Young guns meet the expert on a multidisciplinary team setting Emanuela Esposito, Cecilia Ferrari, Edoardo Mattone, Yasmina Papas

18.30 Visit to Radice Pura Horticultural Park

20.30 Dinner at Donna Carmela

06-05-2018

Morning session

9.00 *Lectio magistralis*: Oncoplastic approach: standard of care for breast conservation. **Tibor Kovacs**

9.30 Workshop on pre-pectoral implant based reconstruction. *Lecturer*: Tibor Kovacs. *Comments*: Dorin Dumitru, Emanuela Esposito

10.00 Video Session Oncoplastic level 2 procedures. **Tibor Kovacs**

11.00 *Interactive talk*: Neoadjuvant treatments and surgery: timing and procedures. *Lecturer*: Isabel Rubio. *Comments*: Antonio Esgueva

12.00 *Interactive talk*: Oncological and surgical safety of nipple and skin sparing mastectomies. *Lecturer*: Nicola Rocco. *Comments*: Giacomo Montagna, Nahid Nafissi

13.00 Lunch

Afternoon session

14.00 Downsizing oncoplastic surgery a revised oncoplastic framework. *Lecturer*: Giuseppe Catanuto. *Comments*: Caroline Richardson

14.15 Teaching pre-operative surgical planning (simulation with living models) Rosa Di Micco, Ayesha Khan, Maurizio Nava, Svanheidur Rafnsdottir, Isabel Rubio

15.45 Conclusions and remarks

16.15 Departure to SUNSET ETNATOUR

20.45 Dinner at Winery on the Etna Mountain

The **interactive talks** include a lecture by a senior speaker (20') followed by comments from other members of the faculty (40'). **Dr. Rocco** and **Dr. Catanuto** will nurture the discussion with clinical cases, personal experience and critical questions. Participants will be directly involved and invited to discuss their own experience and offer solutions.

The **Teaching pre-operative surgical planning** session will be lead by **Maurizio Nava** and **Isabel Rubio**. It will be based on simulation of markings on living models including complex cases with failed surgical results.

Session "**Young guns**" meet the experts on Multi-Disciplinary-Team setting.

In order to maximize educational opportunities the Faculty of the Etna Meeting and G.RE.T.A. are eager to invite participants to discuss a pre-op/post-op clinical case in a simulated multidisciplinary discussion.

The clinical case should be submitted as an abstract (not structured max lenght 250 words) including any detail relevant to the discussion: past medical history-triple assessment-planned surgical treatment/timing-pathology report - proposed adjuvant treatments (the last two only for post-op cases). An updated EU format curriculum vitae is required.

Four abstracts will be selected for discussion. This will last 5' and will include a brief description of the clinical case and the open challenges related to it. Four slides are allowed including diagnostic imaging, pathology slides, relevant anthropometric photography.
